- EZ Networking

NXDN

The Future of Amateur Radio

- Crisp Clear Communications
- Voice AF Response Tuned to the Human Ear
- Excellent Noise Cancelling
- No “Snap-Crackle-Pop”

PROGRAMMING / OPERATING TIPS

- RAN Squelch vs SElective Squelch
- ICOM Radios: RX GROUP
- When To Use TG-1
- RSSI vs BER
- Using an External Antenna

How About Messaging and Other Data Apps?

NXDN for EmComm

NXDN for EmComm

- Crisp, clear, voice even in marginal coverage areas
- Voice content and meaning obscured from “conventional” eavesdropping
- Data and Messaging Apps can be used to convey precise textual information
- GPS-equipped radios can be tracked
- Extending your coverage footprint

Q & A

Thank You!
